John Doe

Senior Python Backend Developer
john.doe@email.com | (555) 123-4567 | github.com/johndoe

PROFESSIONAL SUMMARY

Experienced Python developer with 5+ years building scalable backend services using FastAPI, Django, and Flask. Strong background in database design, API development, cloud deployment, and distributed systems. Passionate about writing clean, well-tested code and mentoring junior developers.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, Bash
Frameworks: FastAPI, Django, Flask, React, Node.js
Databases: PostgreSQL, Redis, MongoDB, Elasticsearch
Cloud & DevOps: AWS (EC2, S3, Lambda, RDS), Docker, Kubernetes, GitHub Actions, Terraform
Tools: Git, Celery, SQLAlchemy, pytest, Swagger/OpenAPI, CI/CD

PROFESSIONAL EXPERIENCE

Senior Backend Developer — Acme Corp (2021–Present)
• Designed and implemented RESTful APIs using FastAPI serving 10K+ requests/day
• Optimized PostgreSQL queries reducing response times by 40%
• Built background task processing with Celery and Redis for async workloads
• Implemented CI/CD pipelines using GitHub Actions, reducing deployment time by 60%
• Mentored 3 junior developers through code reviews and pair programming sessions

Backend Developer — StartupXYZ (2019–2021)
• Developed microservices architecture using Python and Docker
• Managed PostgreSQL and Redis databases in production environments
• Wrote comprehensive unit and integration tests with pytest achieving 90% coverage
• Integrated third-party APIs including Stripe, Twilio, and SendGrid

EDUCATION

B.S. Computer Science — State University (2019)
GPA: 3.7/4.0 | Dean's List | CS Teaching Assistant
